

## MIDWEST 1/12 SCALE BOOTHBAY LOBSTERBOAT KIT

- **Solid value and seagoing realism for the thrifty builder.**
- **Self-aligning by design — and completely equipped.**

Pennywise and practical, the all-wood Boothbay Lobsterboat builds with admirable economy of motion. The hull planks up with only four pieces of balsa; the deck and keel are interlocking and self-aligning, to build straight and strong the first time. The radio and battery compartments are easily accessible through removable cabin roof and deck hatches, and generous — just like the fittings and running hardware. Fittings include everything from buoys and brass hinges to fairleads and lobster traps; running hardware includes fiberglass cloth, shaft, prop, linkages — and a self-aligning stuffing box. Requires a 2-channel radio and accessories. Length: 30 in; Beam: 10 in; Draft: 3.5 in

## MIDWEST COAST GUARD LIFEBOAT KIT

Perform your own search-and-rescue missions with this replica of the U.S. Coast Guard's 47' Motor Lifeboat. The self-aligning hull construction is planked with basswood sheathing, then covered with fiberglass cloth for strength. The radio equipment, battery packs and rudder linkages are easily accessible through the removable pilothouse and rear deck hatch. Fittings include over four dozen high-quality lead castings; complete motorizing package includes shafts, stuffing tubes, props and dual 7.2V motors! Requires a 2-channel radio, electronic speed control and accessories. Length: 30"; Beam: 8.75".

## NIKKO® 1/250 SCALE SEA WOLF EP RTR

So detailed you can see into the cockpit, the 20.5" Sea Wolf sub features a powerful Macuchi motor, digital proportional steering and a 3-channel radio. It even surfaces for recharging if your batteries become weak or fail! Designed for use on pools, ponds and small lakes, the Sea Wolf includes weights for level and depth balancing. Requires 6 "C" and 10 "AA" batteries.

## NIKKO RTR BOATS

Designed for large pools, ponds, and lakes, the 19" Windigo sailboat, the 17" Vixen hydroplane and the 18.5" Rescue Fireboat offer endless hours

of aquatic amusement. While the Windigo relies on wind conditions for sailing power, the Vixen counts on a powerful Mabuchi motor for wave-ripping speeds. The Rescue Fireboat is motorized and includes a working water cannon on-deck. All include a radio transmitter, batteries and charger. See [www.towerhobbies.com](http://www.towerhobbies.com) for details.

## NKOK SCALE EP RTRS

Recommended for ages 8 and up, these Nkok miniature replicas offer hours of wild water fun. The 14" USCG Tug Boat and Duck Tour Boat use "AA" and 9 V batteries for easy assembly. No radio required! Other choices range from the 22" dual-motored Super Air Nautique to the 24.5" wind-powered L'Intrepide Sailboat. These crafts come assembled with transmitter. All except the L'Intrepide include a motor and require a battery and charger (which come packaged with the L'Intrepide). See [www.towerhobbies.com](http://www.towerhobbies.com) for full details.

## TRAXXAS® NITRO VEE™ RTR

- **RTS system ensures that your boat can always come back!**
- **Propshaft clutch offers safer launches.**

There's more to a Nitro Vee than meets the eye — and here's why! It's assembled, with a water-cooled, EZ-Start™-equipped TRX Pro-15 engine installed for potent power and starting ease. It also includes a water-cooled exhaust, the patented RTS (Return-to-Shore) system and an in-line clutch. The RTS is included to bring your boat back to shore even if your fuel tank runs dry; and with the centrifugal clutch on-board, the prop can disengage at idle, to prevent wandering and to increase driver safety. A 2-channel, 27 MHz pistol radio is included and installed. Requires glow fuel, a 6-cell battery w/charger and 14 "AA" cells. Length: 31 in; Beam: 8.5 in; Weight: 3.8 lb.

## TRAXXAS® BLAST™ RTR

- **Ready to go out the minute you get it!**

The name says it all! This great-looking vee is a blast, and it's ready to go within minutes of coming out of the box. Just hook up a 6-cell NiCd in the hull and put batteries in the included 2-channel, 2-stick radio — everything else is already done for you! That includes every bit of assembly (including decal application), installation of radio gear, a 550 motor and forward-only electronic speed control. And once batteries are installed, the Blast is ready to explode through the waves at speeds up to 18 mph! Requires 6-cell battery with charger and radio batteries. Length: 23.8 in; Beam: 5.8 in.; Weight: 1.8 lb.
