

# FLIGHT LINE & TRACK EQUIPMENT

## HOBBOCO® TORQMASTER™ BATTERIES

The **TorqMaster™ LC 12V/7Ah Battery** is ready for use right out of the box. It's not only maintenance-free, but sealed so it can be mounted at any angle. It measures just 5.9" x 3.75" x 2.5", but with its 7Ah capacity, it's all the battery you need for powering starters, chargers, fuel pumps, power panels and more. Weight: 5.25 lb. The **TorqMaster™ Mini 12V 4.5Ah Battery** is also sealed and maintenance-free, but 30% lighter (3.6 lb) and smaller (3.5" x 2.8" x 4") — ideal for smaller field boxes. Both require an AC wall charger (HCAP0200, sold separately).

Stock #	Description	Retail	Tower
HCAP0800	TorqMaster LC 12 Volt 7 Amp Battery.....	\$29.99	\$19.99
HCAP0855	TorqMaster Mini 12V 4.5A Battery .....	18.99	10.99

## 72MHZ RADIO FREQUENCY CHECKER

Why wonder if someone's on "your" frequency? Turn on Frequency Checker, and you'll know for sure! It's no bigger than a deck of cards and weighs just two ounces, so it's easy to take along. Turn it on, and it automatically scans all 50 frequencies in just 15 seconds and identifies each frequency in use with a glowing red LED. Detects in-use frequencies at up to 300 feet alone; add the **Antenna** (available separately) and it extends the range to 1000 feet! Requires 3 "AAA" alkaline cells. 1-year warranty.

Stock #	Description	Retail	Tower
HCAP0340	72MHz Radio Frequency Checker.....	\$79.99	\$39.99
HCAP0341	72MHz Radio Frequency Checker Antenna.....	9.99	6.49

**Maximum muscle for fast, easy starts.**

- Two-year warranty protection.
- Power panel-ready versions come with banana plugs!

## TORQMASTER™ STARTERS

**TorqMaster 90 Deluxe 12V** starts engines up to .90 cu. in. **TorqMaster 180 Heavy-Duty 12V** starts engines up to 1.8 cu. in. Both include an aluminum starter cone with grooved silicone insert; soldered copper contacts; thick carbon brushes; easy-press switch; and 5' DC input cord. Available with factory-soldered battery clips or power panel-ready banana plugs. Spinners and hubs over 3" in diameter require both **Jumbo Drive Cone** and **Jumbo Rubber Insert**. 2-year warranty.

## POWERCORE™ MKII 12V STARTER POWER PACK

Use your electric starter anywhere with the cordless **PowerCore MKII 12V Starter Power Pack**. Included adjustable brackets and attachment straps let you mount the PowerCore onto almost any brand starter for a secure, no-slip attachment. The Power Pack includes a fuelproof, fiber-reinforced plastic case and 12V, 1.2Ah gel cell battery that provides dozens of starts per charge, with enough punch to start big .60-size engines (replacement battery is also available separately). If you have your own 12 volt, 120 mA charger, you can charge the battery through the PowerCore's included power lugs. A built-in charge jack eliminates the need for alligator clips when using the **PowerCore Charger**. The PowerCore MKII Starter Power Pack includes a 1-year warranty.

## SAFETY STICK ENGINE STARTER

- The inexpensive, time-tested approach to engine starting.

Start your engine the safe, easy, economical way — with Hobbico's "chicken stick"-style Safety Stick. Its comfortably contoured, hardwood handle gives you the perfect grip for flip-starting your engine

on the flight line. The end is rubber-coated to prevent breaking or damaging your propellers. There's no better way to turn a couple of dollars into years of dependable engine starts!

## C-CELL ALKALINE GLOW STARTER

**More starting voltage at less cost!**

- Twist-and-Lock design for extra-secure attachment.

It's the best of both worlds: a glow starter that produces higher-than-NiCd battery voltage for a less-than-NiCd cost. No charger is required; simply open the easy-access hatch, install a new "C" alkaline cell and throw the old one away. The high-impact case protects it from occasional "oops!" The standard-length shaft ends in the unique twist-and-lock socket for easy attachment, quick release and a secure grip on glow plugs between. "C" battery required. 1-year warranty.
