

# FUEL & ACCESSORIES

## HPI RACING® POWER FUEL & FUEL TANKS

74318

### Fuels created for R/C cars & trucks.

Optimized for car and truck use, **Power Fuel** combines a 14% castor/synthetic oil content, rust inhibitors and an anti-foaming additive to keep your vehicle running stronger longer! Available in 20% and race-event 30% blends in quart (74318, 74320) sizes. Also available: **Fuel Tank** for Nitro MT2 (87189); Nitro RS4 Racer 2 (72525) and Nitro RS4 3 Evo and 18SS plus Nitro MT2 RTR (87021).

## KLOTZ OIL

Klotz Clean Burn™ technology reduces carbon and residue build-up. Biodegradable **Original Techniplate** (KL-200) is ideal for all gas and glow fuels. **Super Techniplate** (KL-100) is a blend of 80% Original Techniplate with 20% BeNOL Racing Castor Oil. **BeNOL Racing Castor Oil** (BC-175), the ultimate in 2-stroke lubrication, is recommended for use only in fully modified racing engines.

## MDWP SUPER\*DRi SMOKE OIL

- Clear in the jug — dense and long-lasting in the sky.
- Pure white smoke with lasting effects

Write your name across the sky with Super\*Dr! Clear, foam-safe and compatible with electric fuel pumps, Super\*Dr! requires no special handling and creates clouds of dense, long-lasting smoke time after time. And since it's also non-volatile, you pay no haz-mat charge! Designed for use with gasoline-type fuel tank and plumbing.

MDWP1000

## PERRY PUMPS

With a Perry Pump, you can depend on a consistent performance and a constant flow of fuel, regardless of attitude, tank position or fuel level. Designed for 2-stroke, .15-3.0 engines, the **Regulating Pump** (VP30) maintains pressure at a constant .25 psi and eliminates rich/lean runs entirely. The **Oscillating Pump** (VP20) for 4-strokes mounts on the crankcase and uses engine vibration to ensure fuel delivery. Mounting plate included. For glow fuel use only. See [www.towerhobbies.com](http://www.towerhobbies.com) for requirements.

## PRO-LINE STRAIGHT SHOOTER FUEL GUN

Pull the trigger and the Straight Shooter Fuel Gun delivers 4.6 oz. (135 cc) of fuel in a fast 1.5 second blast. Maximum reservoir capacity is 5.75 oz. (170 cc), which is visible through the translucent barrel. Spills are not a problem because there are no-leak O-rings on the reservoir and barrel. The black anodized 6061 aluminum endcaps and the lightweight injection molded pistol grip ensure a lifetime of fast, efficient refills.

## ROBART® SUPER FUELER 2

When you refuel with Robart, there's no need to remove cowls or fuel lines: just attach fuel tubing to the port on the fuselage and fill! The Fueler is compatible with glow fuels, gas fuels and smoke fluids, and easy to install. Drill a hole, put your Fueler in place, attach lines and you're ready for your first easy fill-up. Flip up the lid on the aerodynamic Super Fueler 2 and fuel can flow freely into the tank. Flip it back in place, and you're ready for takeoff.

## SIG® FUEL & FUEL PUMP

Only slightly larger than a 550-motor, the **Fuel Pump** works at an amazing 60 oz./min. rate. Compatible with glow, gas and diesel fuels, it arrives with the fuel-resistant case already in place on a mounting bracket. Includes stepdown inserts, nozzles, and connectors. 12V DC power required. **Champion 1/2A Fuel** gives 010-.049 engines what they need for proper starts and operation, and 2-strokes added power for competition. Sold in quarts.

## SLIMLINE™ GLOW FUEL PUMPS

- Designed to last — and fill or drain fast!

Both pumps include the Pro Cap 360, a CNC-machined aluminum innovation that threads onto any 1-gallon fuel bottle and keeps fuel factory-fresh with an O-ring seal! Capable of 16 oz./minute operation, the electric **2001** features a unique, no-gear design that's both anti-siphoning and self-priming. Includes fuel/drain switch, oversized motors, leads w/banana plugs and a limited 2-year warranty. Requires 12V DC power. Low-cost **M4 Manual Fueling System** includes a universal filling nozzle and a mounting bracket for the hand-cranked composite fuel pump. Both include silicone fuel line and hardware. For glow-fuel only.

## SULLIVAN FUEL PUMP AND FILTERS

- Amazing, quart-a-minute operation!

Fast and efficient, the **Streamer** will fill or empty a 32 oz. tank in just a minute! Features include a direct drive design, ultrasonically welded pump head, and a fuel-resistant case with mounting flanges. Requires 12V DC power. Great with gas, glow, and diesel fuels. **CT filters** have dual screens to remove harsh impurities. Their clear bodies show when cleanup is needed, while aluminum ends offer durability and easy hook-up.

## TME SYSTEMS

With TME's help, you can add smoke to any .40-giant-scale plane without soldering, servos, complicated plumbing or wiring, pressurized tanks or voiding your engine warranty. Both include a geared pump w/universal radio plug, radio-activated on/off switch, check valve, T-fitting, 4' of clear yellow smoke oil tubing and 4" of neoprene tubing. **SmartSmoker** (SSP-SSD) adds "Smart Prime" feature and Intelligent Flow Rate Controller for fine-tuning by transmitter. Both require spare receiver channel, 4.8-6V receiver battery, smoke oil and tank.

## TRAXXAS® TOP FUEL™

- The cool complement to Traxxas' red-hot TRX Pro .15!

When you're burning up the track with a TRX Pro .15, there's only one way to defeat the heat it generates, and that's Traxxas Top Fuel. Top Fuel meets the exceptionally high heat levels in the .15 with extra-generous amounts of lubricating oil to prevent heat-related damage or seizing. It's the only fuel Traxxas blends for its buggy engines, and the only one it recommends for keeping the TRX Pro .15 cool. Available in quarts.

## TRINITY® FUELS

They're made with the purest nitromethane and ethanol available, and with a variety of synthetic/castor oil percentages for different applications. There's **Monster Horsepower** with 12% oil for everyday driving, **Monster Brew** with 16% oil for RTRs, monster trucks and backyard bashin' and **Monster Horsepower Break-in Fuel** with 20% nitro and 18% oil, ideal for break-in and 4-stroke engines alike. All three are also loaded with anti-foaming agents and rust inhibitors, as well as additives for faster starting, smoother mid-range and easier tuning. Sold in quarts. **Monster Horsepower** also available in a 4 gallon case.

## WILDCAT FUEL

- High performance with great protection!

Only the finest ingredients are used in Wildcat fuels — top-quality nitro, first-run methanol and the highest grade pressed and degummed racing castor. **Premium 15%** (105Q, 105) can be used in all 2-stroke ABC or AAC ball bearing engines. **Premium Extra** fuels (104Q, 104, 105) contain extra oil for ringed, bushed engines and break-in. Synthetic **2/4 Stroke** (109) fuel can be used in any 2 or 4 cycle engine. **Helix-Mix** (116, 117, 118) helicopter fuel is designed to produce maximum power and cooling. **4-Stroke** (161) contains 18% synthetic oil to provide the increased lubrication that 4-stroke engines require. **Eliminator Plus** (173, 177) 20% nitro car fuel has 18% oil for engines that require more oil for extended or hot operation. Available in quarts or gallons.
