

3M™ SPRAY ADHESIVE

- A fast, aggressive tack that offers a "soft" bond for easy repositioning!

Super 77 Spray Adhesive offers a fast, aggressive tack for use with most lightweight materials. Super 77 is ideal for low-pressure spraying with minimal misting and cobwebbing. Great for tacking down foam wing sheeting, or creating "do-it-yourself" sticky-backed sandpaper, Super 77 bonds in 15 seconds.

	RETAIL	TOWER

MMMR2000 77-17 Super 77 Spray Adhesive 16.5 oz.	21.99	19.29

DAVE BROWN SOUTHERN'S SORGHUM CONTACT ADHESIVE

Latex-based **Southern's Sorghum** is an easy choice for balsa-sheeting foam wing cores. Just brush on, wait for 30-45 minutes and press sheeting and cores together to form a light, tight bond. Water-based formula is fume-free and cleans up with just water. **CA Applicators** fill from your regular CA supply with just a squeeze; a 4.5" spout extends your reach and narrows the tip, so you can spot-glu in the most inaccessible areas with pinpoint accuracy. 12/package.

DAVR2800 SGHM Southern's Sorghum 7 oz.	7.95	7.59
DAVR3700 CAAP CA Applicator (12).....	4.95	4.79

DEVCON® ADHESIVES

Fuelproof, 2-part **5-Minute Epoxy**® sets in 4-7 minutes, making it ideal for quick fixes. **30-Minute Epoxy**® sets slowly and penetrates deeply for strong bonds. These 9 oz. bottles offer 4.5 oz. each of hardener and epoxy.

	RETAIL	TOWER
DEV2020 S-209 5-Minute Epoxy 9 oz.	16.19	14.99
DEV2030 S-33 30-Minute Epoxy 9 oz.	15.00	13.99

DURATRAX® GLUES

Watertight and flexible, 3.7 oz. tube of **Shoe Goo** squeezes on and dries strong — ideal for building battery packs. **Pit Tech Tire Glue** bonds tires securely to wheels. Available in .5 oz. bottles of Thin or Medium formulas. **Pit Tech Threadlocker** locks threaded fasteners against vibration — perfect for use in any R/C application. .2 oz. bottle.

	RETAIL	TOWER
DTXR2460 Shoe Goo 3.7 oz.	7.99	4.99
DTXR2000 Pit Tech Tire Glue Thin .5 oz.	4.99	3.99
DTXR2002 Pit Tech Tire Glue Medium .5 oz.	4.99	3.99
DTXR2010 Pit Tech Threadlocker .2 oz.	3.49	2.99

HOT STUFF™ ADHESIVES

UFO (User Friendly Odorless) glue offers all the advantages of Hot Stuff in an odorless, non-fuming formula — cures in just 7 seconds. **UFO Thick** cures in 50-60 seconds, making it the adhesive of choice for gap filling, laminating and planking. Thin **CA Glue** easily penetrates tight-fitting joints. Thick **Super T** fills gaps, makes fillets and solid bonds with plywoods and hardwoods. Both are odorless. **Super Solvent** removes cured glue from skin, clothes and hard surfaces. A spray of **NCF Accelerator** will speed CA cure times, and it contains no freon to harm the environment.

J-B WELD EPOXIES

- **J-B Weld: The easy answer to high-strength hold.**
- **J-B Kwik: The quick fix for home and hobby jobs.**

Made of a liquid steel/epoxy resin blend, versatile **JB Weld** forms like putty, sands like wood, and machines like metal. Stays pliable for about 1/2 hour, sets in 4-6 hours, and cures waterproof and resistant to shock, chemicals, vibration and temperatures in 15-24 hours. Available in a 1 oz. size or **Mini One Time Use** that makes it simple to mix and use. Light-duty **J-B Kwik** for fast repairs cures in just 4 minutes. Both clean up (before setting) with soap and water.

J&Z R/C-56 GLUE

- Works on wood, fiberglass, paint, MonoKote®, ABS and many other surfaces.

J&Z R/C-56 is a multi-purpose adhesive that's specially formulated to bond canopies to wood, fiberglass, paint or surfaces covered in MonoKote. This adhesive will also safely bond ABS, butyrate, styrene foam, and other plastics. R/C-56 forms a firm, flexible clear bond that can withstand shock and vibration. It comes in a 4 oz. bottle. Also good for rocket building.

	RETAIL	TOWER
JOZR5007 5007 R/C-56 Glue 4 oz.	4.25	3.49

JET™ ADHESIVES

Developed to withstand the heat and vibration common in flying model airplanes, Jet glues are ideal for a wide range of uses. Fast-set **Instant Jet** penetrates and reinforces porous surfaces, great for tacking and various final bonds. **Super Jet** medium viscosity has exceptional strength and gap-filling capabilities. Thick **Slow Jet** provides maximum gap-filling and extra strength. **Jet Set** accelerator works with most CA glues.

PROR6009 6005-02 New Formula Premium Blend CA Med .7 oz.	9.50	8.99

PACER CA GLUE

ZAP CA's super-thin formula helps it "wick" into fibers to create lasting bonds. It penetrates in an instant, and cures in just 1-5 seconds. Ideal for general wood construction, medium-viscosity **Zap-A-Gap** can even penetrate oily surfaces! Fills minor gaps alone, or larger gaps with Zip Kicker use. Non-fuming **Zap-O** is compatible with most hobby materials — great on styrofoam, and won't fog most clear plastics. Thick formula **Slo-Zap** gives maximum strength in high-stress areas and is ideal for filling gaps and forming fillets. Use clear-curing, medium viscosity **Plasti-Zap** for plastics. **Poly-Zap** is a high-performance, non-fogging formula for lexan, polycarbonate, etc.

	RETAIL	TOWER

PACER Z-POXY™

- Epoxy performance that tops the rest.

Odorless to use, clear when dry, Z-Poxy products offer maximum bonding power for modeling. Vibration-resistant **5-Minute** cures to a sandable, fuelproof finish and remains flexible over time. Extra-strength **30-Minute** offers 20-30 minute working times and cures in 3 hours; compatible with microballoon fillers.

	RETAIL	TOWER
PAAR2206 PT37 Z-Poxy 5-Minute 4 oz.	10.69	9.49
PAAR2207 PT38 Z-Poxy 5-Minute 8 oz.	14.59	12.99

PACER CANOPY GLUE

- Clear, fast drying formula
- Extremely shock resistant.

Formula 560 creates a strong, flexible bond on vinyls and plastic materials, making this adhesive perfect for use on canopies. Parts can be glued to almost anything. Safe, non-toxic formula dries for handling in 3 hours, with a full cure in 24. Clean up is easily done with water while the glue is still wet. Canopy glue comes in a clear plastic 2 oz. bottle.

	RETAIL	TOWER
PAAR3300 PT56 Ric 560 Canopy Glue 2 oz.	3.79	3.49

PACER ZIP KICKER™

- Environmentally safe accelerants for most modeling materials.

Just spray on **Zip Kicker**...and you've got strong, tight bonds in an instant. Great for hard-to-bond applications and curing fillets made with Slo-Zap, Zip Kicker is safe to use on virtually all modeling materials *except* plastic — and safe for the environment, too. Available in a 5-oz. aerosol for large areas, a 2-oz. pump spray formula for small-area applications and an 8-oz. refill for outstanding economy. **Foam Safe** formula is great for use on most foam materials.
