

PAINT & ACCESSORIES

PACTRA® MASKING TAPE

When a crisp, clean line is a must, Pactra masking tape is the answer. Extra-thin to prevent edge build-up, it's ideal for tight curves as well as rule-straight lines. It's low-stretch so it minimizes lifting and low-tack so it's easy to remove. Even so, it resists moisture and solvents so it sticks where it's stuck until you strip it away. Available in 20-foot rolls of 4 sizes.

PAASCHE AIR COMPRESSORS

Oil-less, diaphragm-style models include the 1/10 hp **D500** which is ideal for all airbrushes and properly thinned fluids. Delivers 20-30 psi. **D500SR** includes on/off switch (S) and regulator. Piston Compressors include the 1/8 hp **D100** and **D100R** (15-25 psi, for light materials), and 1/6 hp **D200R** (30-40 psi, for heavier materials). Models with auto shut-off are the 1/7 hp **DA300** (17-30 psi) and the **DA300R** and **DA400R** (up to 40 psi) with pressure regulator and moisture trap.

PAASCHE AIRBRUSH SETS

Dual-action, internal-mix **MIL-Set** and wood-cased **VLSTPRO Wood Pro Set** offer the improved comfort and control of a rounded trigger button, plus a cutaway handle for quick clog clean-out and a longer trigger guide for more flow at maximum draw. Like the Mil-Set, the dual-action, internal-mix **VL** and single-action, external-mix **H-Set** includes the 22 *Airbrush Lessons* booklet, plus wrench, hanger, air hose and 7cc color cup. See www.towerhobbies.com for full set contents. All include 1-year warranty.

PARMA® MASKING MATERIALS

Exercise maximum color creativity with Parma masks! Precut **Paint Masks** make pro-look paint jobs a breeze: just peel forms from the backing sheet and press 'em in place. Their super-strong adhesive prevents edge bleeding, but releases cleanly after use. For one-of-a-kind designs, try uncut **Vinyl Mask Sheet** or **Fasmask Liquid Paint Mask** — it brushes on and cuts cleanly with a #11 blade before you paint, won't let paint seep through while you paint — and peels away cleanly afterwards.

PARMA® PSE FASKOLOR™ PAINTS

Applied by airbrush, water-based Faskolors don't just go on a surface; they become part of it, forming a flexible, fuelproof, crack-, chip- and impact-resistant barrier. They thin with water, and go on best in light coats; warm them with a hair drier between coats, and they dry, cure and bond faster and better. Great for Lexan®, but also brilliant on plastic, fiberglass, metal, wood, styrofoam or ceramics. Available in standard **Faskolors** (40000-40012), **Faspearls** (40050-40058, 40301, 40302), **Fasfluorescents** (40101-40107, 40304) and special **Fasocents** (40151-40153). Also available: **Fastint** (40191) for windows and **Faskrome** (40300), which can be used as silver, or backed with Fasblack for a chrome finish. **Faslucent**s (40306, 40307) are transparent colors that give a candy finish when backed with other colors. **Faskoat** applies and dries clear, to seal colors against oxidation and fuel residue.

ROBERT® PAINT SHAKER

Blends paints as quickly and thoroughly as 5,000 shakes a minute can do it. Just strap a paint bottle in place, hit the on/off button and your paint's ready before you know it. Works with regular household current, ¼- to 1-oz. paint bottles — and works so well that a patent is pending. Limited warranty.

SAFEGORLD CAN GUN

Get a grip on greater comfort and control! Its mounting system attaches to virtually any spray can, for an easier way to apply paint, sealants, insecticides and more. Heavy-duty black plastic construction makes it durable. Simple, trigger-action lever gives you a better way to control direction, speed and coverage and a less tiring way to achieve even application during continuous spraying.

TAMIYA SPRAY-WORK AIRBRUSHES

The **Basic Compressor**

(74520) runs on a 72V battery pack and delivers 15 psi. Included airbrush can cover broad areas or create 2mm lines.

74514

Separate **Spray-Work HG Airbrushes** include a trigger-style model (74510) for extended use, and a single-action model (70514) which can produce lines as fine as 0.5 mm.
