

DAVE BROWN R/C SIMULATOR

• Create and "fly" aircraft on your computer!

"Fly" in any weather, and acquire skills without risk with Dave Brown R/C Simulators. IBM-compatible 2001 Simstar (RCFS) adds photo-realistic graphics and recorded sound to the ability to fly — and adjust the characteristics of — today's most popular planes. Pilots can fly from any spot on 4 real-world flying sites, including the AMA site in Muncie, Indiana. Includes CD-ROM and Simstar controller. See our web site for system requirements.

HARRY HIGLEY'S ALL ABOUT ENGINES

Learn how to operate your first engine correctly, or solve problems in an old favorite with this 120-page reference tool. Learn all aspects of 2-stroke, 4-stroke, glow, gas and diesel engine operation, how to do valve jobs, teardown or 4-stroke maintenance and how to solve common (but hard-to-handle) problems like stripped screw holes, broken screws and more. More than one thousand helpful photographs included! 124 pages.

HARRY HIGLEY'S RADIO PROGRAMMING FUTABA'S 9CA

This book explains how to program the Futaba 9CA for airplanes. The 1300 step by step photos help make programming this radio a snap. Each step consists of a brief written explanation, a photograph of what buttons to push and a second photograph that shows the display after the buttons are pushed. In many instances, photos of the model's control surface before and after the programming step appear to clarify it. Get the most from this radio - painlessly. 89 pages.

HARRY HIGLEY'S AIRPLANE BOOKS

Harry Higley's popular books about learning to build and fly R/C models have helped thousands — just ask at any flying field! From the beginner's **Getting Airborne Volume I** to the pro's **Master Modeling**, Higley's well written, richly illustrated books can help prevent new problems or solve existing ones. Their latest book, **Foaming Around**, includes topics such as retro-fitting a variable pitch to an existing model, and much more. See our web site for more information.

MILT HELI DVDS

- Complement on-site teaching with video tutoring.
- The 43-minute tape that can help you save days of reading time.

Shorten the time between first sight and first flight with the modern way to "ground" in R/C: video! The 43 minute **How to Fly R/C Helicopters** features short sections on basic building and flying techniques, principles of heli flight, tools, field set-up, hovering, basic forward flight and more. Heli pilots who are ready to move up from basic flying to the next level will get a head start with the 45 minute **Advanced Heli Flight Course**, featuring explanations and demonstrations from heli expert Datu Ramel.

RUNTIME GAMES PHOENIXRC™ FLIGHT SIMULATOR

• A great flight simulator — at a great price.

Developed, tested and approved by British champions and 3D master aerobats, the PhoenixRC Flight Simulator packs a lot of realism, fun and excitement into a competitively-priced package. The physics are incredibly accurate, the graphics are state-of-the-art, and the choice of aircraft is extensive. Plus, the Phoenix simulator has a couple of things going for it that others don't: water-based takeoffs and landings, and the experience of flying a true autogyro! See our web site for system requirements.

VIAGRAFIX CAD SYSTEM

- Design/drafting aids for a new generation of genius!
- Get help on-line — and tech support at NO cost!

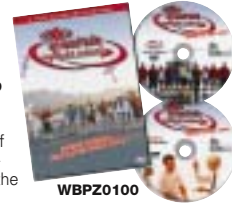

Transform design dreams into CAD realities with ViaGrafix, and enjoy FREE tech support and 24-7 help on-line! ModelCAD 3000 has all the features you need to make a complete sets of plans and print them to scale on items such as airplanes, boats, cars and trains. Use the great double-line commands or drawing wizard to perfect even the most complex design. ModelCAD also comes with the ability for you to: create your own airfoils, automatically generate a 3-part view of your model, determine center of gravity, make distance and area calculations, add dimensioning, get online help and enjoy precise, easy drawing. See our web site for system requirements.
